

PATENT
IBM Docket No. CH9-2001-0018

Amendments to the Specification:

Kindly delete the first paragraph of the "Field of the Invention" section of Applicant's Specification and replace it with the following:

"The invention relates to a method to verify preprocessed Java code (Java is a trademark of Sun Microsystems). Essentially it comprises a conversion step after which language verification of non-preprocessed Java code is utilized. In particular, a technical solution is suggested that allows for the conversion of preprocessed Java card converted applet (hereinafter CAP) [[CAP]] files back into standard Java class files. This conversion can be achieved in a provably correct way, thus solving the problem of language verifying Java card CAP files. The proposed concept is also applicable to preprocessed code in languages other than Java."
